

Dual Semantic Graph Construction

train-only priors · constrained adaptation

Data sources

train-only statistics

No validation/test statistics

raw + valid mask

wind-speed history

Semantic priors

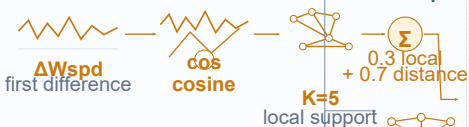

Macro / m

trend semantics

Micro / mu

local-change semantics

Shared distance support

$$A_{d,ij} = \exp(-\|r_i - r_j\|^2 / \sigma^2)$$

$K=5$

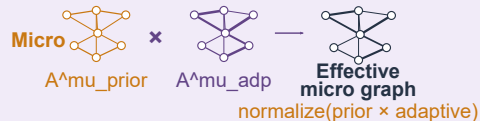

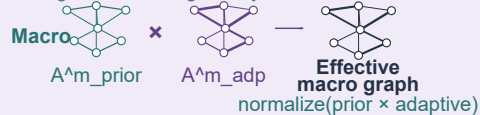

Macro prior

Micro prior

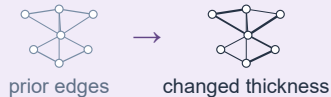

Prior-constrained adaptation

Independent E1, E2 · dim = 10

reweight allowed edges only

same node set + same support

edge strength changes; support fixed
