

Dual Semantic Graph Construction

Train-Only Priors and Constrained Adaptation

1 Data Sources

train-only

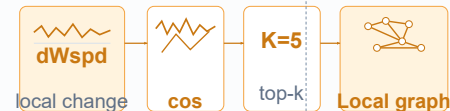

2 Semantic Priors

Macro / m

Macro Prior
Trend x 0.7
+ Distance x 0.3

Micro / mu

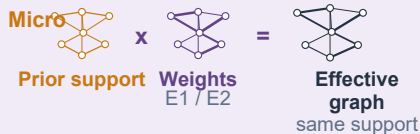

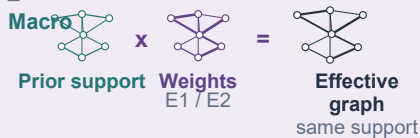

Micro Prior
Local x 0.3
+ Distance x 0.7

Geographic distance
Gaussian kernel
K = 5

3 Prior-Constrained Adaptation

Independent node embeddings

$d_e = 10$

same node set
same support
reweighted edges
